

Vontobel Custom Plus

Product information

Vontobel Custom Plus

Your objective

Your goal is a stable, long-term performance for your assets and you have specific criteria for how your portfolio is managed. You are looking for a solution that defines and implements your needs and goals as part of an individual investment strategy.

Your solution

The Vontobel Custom Plus mandate is based on your specific investment needs and is compiled and tailored to your individual requirements. Your investment strategy and the weighting of the asset classes are individually coordinated. Choose between active and passive implementation as well as collective investments or investments in individual securities. With the Vontobel Custom Plus mandate you also have the opportunity to select the foreign currency allocation as well as individual investment instructions.

The portfolio is managed in a structured investment process with systematic portfolio monitoring and risk management. All the expertise of our specialists is at your disposal. Considering the characteristics of this product, sustainability risk considerations are not integrated into the investment decisions affecting it.

Sustainability risk is considered to be an ESG condition that, if it occurs, could cause an actual or potential material negative impact on the value of investments. Sustainability risks usually materialize over a longer time horizon than those considered for the product's weighted average duration and weighted average residual maturity. Consequently, the likely impacts of sustainability risks on the returns of this product are not deemed to be relevant.

This mandate does not consider the principal adverse impacts of investment decisions on sustainability factors, as the required data availability and data quality for the underlying assets in this investment strategy is currently insufficient for this purpose.

The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Product description

Product	<ul style="list-style-type: none"> Discretionary investment solution with individual investment strategy and individual implementation Individual currency distribution Individual investment instructions
Investment strategy	Individual
Investment currencies	CHF, EUR, and USD Further currencies on request

Product specifications

- Individualized managed solution by defining investment strategy and implementation
- Use of a proven active investment process
- Use of independent internal research resources
- Continuous monitoring and active portfolio risk management

¹ The lowest fees applied are those calculated on the basis of the minimum invested assets. Portfolio management fees are charged in addition to the fees for Vontobel Access.

² Fees based on amount invested per year. The fee applies to the full amount invested in the mandate and corresponds to the effective price.

Vontobel Custom Plus Sustainable

Your objective

Your goal is to achieve stable, long-term financial performance while investing in assets that promote environmental and social characteristics, and you have specific criteria for how your portfolio should be set up and managed. You are looking for a solution that defines and implements your needs and goals as part of an individual investment strategy.

Your solution

The Vontobel Custom Plus Sustainable mandate is based on your specific investment needs and is compiled and tailored to your individual requirements as they relate to promoting environmental and social characteristics. Accordingly, the weighting of the mandate's asset classes is coordinated with the investment strategy developed especially for you. You can choose between active and passive implementation, as well as between collective investments or investments in individual securities. With the Vontobel Custom Plus Sustainable mandate, you also have the opportunity to select the foreign currency allocation, as well as submitting individual investment instructions to exclude specific (sub-)asset classes, individual equities, or even entire sectors. All the expertise of our specialists is at your disposal as they manage your portfolio according to a structured investment process that includes systematic portfolio monitoring and risk management.

In case you would prefer not to adhere to the core set of sustainability criteria or take sustainability risks into consideration, or would like to disregard our usual exclusion rules and minimum ESG ratings, Vontobel would structure your customized offering under the "Custom Plus" label instead of "Custom Plus Sustainable."

Our investment process

In the selection process, your Portfolio Manager actively integrates sustainability risk considerations, seeking investments that promote environmental and social characteristics in such areas as e.g. climate action, climate risk mitigation, access to clean energy or clean water, the circular economy, or that address socially sustainable themes like affordable access to high-quality healthcare services or education, affordable housing, financial inclusion, and gender equality. For the selection of single equities and single bonds of corporates, supranational issuers, and agencies, the Portfolio Manager applies a four-step screening process:

Equities & corporate bonds

Vontobel applies a sustainability risk filter as a very first step by excluding companies that are involved in controversial sectors, because they may not be considered economically viable or may be harmful in terms of long-term sustainability ([Sustainable Investing and Advisory Policy](#)). This screening also demands compliance with the Ten

Principles of the UN Global Compact in the area of human rights, labor, environment, and anti-corruption and will exclude any red-flagged companies based on MSCI ESG controversy ratings ([MSCI ESG Ratings](#)).

In order for the portfolio to attain the desired sustainability characteristics, the next step of the process sees the Portfolio Manager apply a best-in-class approach to the selection of individual investments, requiring them to meet at least a minimum MSCI ESG rating. Are the revenue streams of the companies under consideration aligned with the UN Sustainable Development Goals? Companies not fulfilling these criteria are excluded. A final check is conducted to see if the companies are on the Vontobel "Sustainable Buy List" or are on an Exception list of companies that do not fully meet the sustainability criteria but have a clear climate transition strategy, for example by significantly investing in renewable energy and pursuing an explicit zero carbon emission target while still having exposure to nuclear or coal power.

Sovereign bonds

For the selection of sovereign bonds and bonds of sub-national issuers, the Portfolio Manager applies a three-step screening process:

In the first screening, countries retaining the death penalty and the widespread use of child labor are excluded from further consideration. The second screening filters out countries that do not meet the minimum [MSCI ESG rating](#), and the third screening identifies bonds that overlap with Vontobel's recommendation list, which is compiled based on fundamental analysis. This multi-step screening process is performed by the Portfolio Manager on a regular basis.

Collective investments

Regarding collective investments (for example, active funds, passive funds, or thematic certificates), our dedicated in-house fund research team, in addition to conducting a financial analysis, also undertakes proprietary ESG research in collaboration with sustainability experts, which incorporates ESG metrics ([Sustainable Investing and Advisory Policy](#)). Having input from sustainability experts as well as fund selection specialists ensures that we do not compromise on either the quality of funds selected or on sustainability and performance prospects.

The starting point is the fund universe of [Refinitiv Lipper](#), which complies with Article 8 or 9 under the Sustainable Finance Disclosure Regulation ([SFDR](#)). From there, the dedicated in-house fund research team identifies funds that either promote environmental or social characteristics or pursue sustainable objectives; the team also contacts the respective fund managers to provide more details. These collective investments are all managed by leading investment managers and investment firms. Based on additional in-house quantitative and qualitative analysis of performance track records and risks, a sub-

set of collective investments is identified. In the next step, the investments in the different asset classes are assessed individually in order to minimize sustainability risks and ensure that the investment process contributes to the sustainable characteristics of the Vontobel Custom Plus Sustainable mandate as described above. This includes compliance with the Ten UN Global Compact Principles. To enhance the promotion of those characteristics, we also apply pre-defined exclusions, for example, armaments and controversial weapons, tobacco, nuclear power, thermal coal, and further critical and controversial activities. Additionally, the team analyzes whether it can credibly implement, maintain, and execute the investment process based on the selected collective investments. A yearly in-depth assessment of the process, including a manager interview, complements the investment process.

The data obtained from third-party data providers may be incomplete, inaccurate, or unavailable. As a result, there exists a risk of incorrectly assessing a security or issuer, resulting in the incorrect inclusion or exclusion of a security. The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

The performance of the Vontobel Custom Plus Sustainable mandate is measured against an individual financial benchmark based on your specific investment guidelines, investment objectives, and requirements, and the availability of Vontobel. Based on your requirements, the investment process used may deviate from the one described above, in such areas as exclusions (for example, fewer or more exclusions), minimum ESG risk-based ratings (stricter or less strict criteria), and alignment to UN SDGs (for example, using other environmental and social characteristics). Please find more information related to reference currencies, minimum investments, and fees on the first page under product description.

Investment suitability

This publication is intended for general distribution. It is not part of any offer or recommendation and does not take into account your knowledge, experience, and personal situation, which is required for personal investment advice.

Legal information

This publication is deemed to be marketing material within the meaning of Article 68 of the Swiss Financial Services Act and is provided for informational purposes only. We will be happy to provide you with additional information about the specified financial products, such as the prospectus or the basic information sheet, free of charge, at any time.

Nothing contained in this publication should be construed as a solicitation or an offer or a recommendation to use any service or product, to buy or sell any investment or to carry out any other transaction. The information contained in this publication does not constitute investment advice or financial analysis. It is for information purposes only and therefore does not meet statutory requirements in terms of ensuring the impartiality of financial analysis. The information and views contained in this publication are intended for information and marketing purposes only and do not take into account any individual investment objectives, financial circumstances or requirements. The products and services described in this publication are supplied exclusively under the agreement entered into with the investor. Bank Vontobel AG makes no warranty as to the reliability or completeness of the information contained in this publication and disclaims all liability for any loss that may be suffered as a result of using such information. The nature, scope and prices of the products and services described in this publication may vary from one country to another and may change without notice at any time. Certain services and products are not available worldwide or from all companies within Vontobel. In addition, they may be subject to legal restrictions in certain countries. Information on asset and currency allocations is approximate, intended for general guidance only and subject to change at any time. Such allocations may also vary from one client portfolio to another. Prior to making any investment decision or making any decision to use any products or services described in this publication, investors should determine whether such products and services are appropriate for their individual needs and independently verify (by consulting professional advisors where necessary) the specific risks involved (risk of loss, currency risks) and the potential regulatory, credit, tax and accounting implications. The tax treatment of products and services described in this publication will depend on individual circumstances and may change in the future. Bank Vontobel AG makes no warranty that any investment decisions and/or investments made in relation to products or services described in this publication will take due account of the investor's tax situation and accepts no liability in respect of the tax treatment of assets or any income generated therefrom. Moreover, Bank Vontobel AG makes no recommendation or endorsement with regard to any products or services described in this publication or their suitability for specific investors. Neither does it make any representation or warranty of any kind as to future performance. Investors should be aware that there are certain risks associated with all types of investment and that investments may be subject to sudden and large falls in their value. Investors are hereby advised to take note of the risks involved, which may be substantial. The products and services described herein are only intended for investors who understand and are willing to accept the associated risks. If the securities market becomes illiquid, it may not be possible to realize the value of certain investment products immediately. If investments are liquidated, investors may get back less than the amount originally invested. Investments in foreign currencies are subject to exchange rate fluctuations. Investing in emerging markets involves special or higher levels of risk. For this reason, it may be difficult to quantify the value of an investment and the risks to which investors are exposed.
