

volt invest (EUR)

Product information

Your objective

You are looking for access to the global financial markets and active management to benefit from long-term, constant, asset development. While you would like to set specific investment focusses by yourself, you would prefer to delegate the selection of suitable securities and monitoring of risks to our experts who will actively manage your portfolio according to your requirements and goals. You want a solution with digital access to have access to your portfolios at any time. Social and environmental responsibility in the investment process is important to you.

Your solution: volt invest

volt by Vontobel offers you a digital platform, which can help you realize various investment objectives. With the smartphone app, you have access to your portfolios at any time with all the information at your fingertips.

With volt invest, you have a professionally managed portfolio with broadly diversified investments in bond and equity markets. Your portfolio will be actively managed using a professional investment process and systematic risk monitoring.

With volt invest, you can set your investment focusses according to your personal convictions:

- You choose the investment strategy that suits your personal risk situation and, thus, determine the equity allocation of your portfolio.
- If you wish, you can choose a ready-made expert portfolio or compile your portfolio individually according to your preferences.
- We inform you in the app about current investment themes that we find convincing. You can add or remove the individual themes at any time.
- Your portfolio can have a global focus or follow a specific regional focus, as you wish.
- To further round out your portfolio, you can add alternative investments (gold, real estate, commodities, hedge funds) if you wish. Here, too, our experts will select suitable investment instruments.
- Environmental and social sustainability criteria are taken into account in the investment process.

¹ The corresponding portfolio share will be invested at the Bank's discretion from the other asset classes.

Our investment process

Our investment process actively considers environmental and social characteristics for sustainability risk into the selection process. For collective investments, specific ESG analyses are performed in addition to a financial analysis. Funds that take ESG factors into account, minimize sustainability risks, and comply with the ten UN Global Compact principles are considered.

Government bonds in the investment currency are included in the portfolio due to diversification and risk considerations, and the EU criteria for environmentally sustainable economic activities cannot be considered in all cases. The same may apply to collective investments in alternative investments and to the themes that are added to the portfolio at the client's request.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Notes on sustainability risks

The mandate's investments may be subject to sustainability risks. The Portfolio Manager's integration of sustainability risks in the investment decision-making process is reflected in the investment policy. The mandate has recourse to both internal and external ESG research and integrates financially material sustainability risks into its investment decision-making processes. More information may be obtained from the [Sustainable Investing and Advisory policy](#) ([vontobel.com / About Vontobel / Principles and policies](#)).

The sustainability risks that the mandate may be subject to are likely to have a low impact on the value of the mandate's investments in the medium to long term due to the mitigating nature of the mandate's sustainability investment policy and ESG approach incorporating exclusions of sectors that harm environment and society, excluding companies, which fail to comply with the Ten UN Global Compact Principles, and excluding ESG laggards based on third party provider data.

Product description

Product	Discretionary investment solution with digital access
Investment strategies	Defensive, Conservative, Balanced, Growth, Dynamic
Investment currencies	CHF, EUR, USD

Product specifications

- Professionally managed portfolio that invests in bond and equity markets in line with your risk profile—globally or with a specific regional focus
- Active selection of the investment instruments by our experts – proprietary investment products and third-party products are used
- Consideration of social and environmental sustainability criteria in the investment process
- Ongoing portfolio monitoring to enable prompt rebalancing in the event of deviations from your investment strategy
- Access to your portfolio at any time through the smartphone app

Opportunities

- Broad diversification across a range of securities
- Possible additional returns through analysis of individual securities and active management
- Possible gains on invested capital
- Bond investments offer interest income and opportunities for capital gains when market returns decline.
- Potential gains on investments based on market, sector, and company developments.
- Investments in foreign currencies may result in currency gains
- Participation in investment themes and alternative investments (when selected by the client)

Risks

- Limited participation in the potential of individual securities.
- No guarantee of success with individual stock analyses and active management
- The share price may drop below the purchase price at which the investor purchased the share
- The interest rate level can fluctuate, and bonds experience price losses during interest rate increases
- Market, industry, and company price fluctuations are possible
- Investments in foreign currencies may involve an exchange rate risk
- Price loss in investment themes and alternative investments (when selected by the client)

Investment strategies

Defensive

Investment objectives				
The aim is to preserve assets. You wish to achieve a certain yield, but it is more important to you to allow minor asset fluctuations.				
Risk profile				
Low risk		Higher risk		
low	moderate	medium	increased	high

Strategic portfolio structure¹		%
█ Equities		10
█ Bonds		88
█ Liquidity		2

Conservative

Investment objectives				
The aim is to achieve a steady development of the assets with a moderate growth rate by taking only minor risks with small fluctuations of the assets.				
Risk profile				
Low risk		Higher risk		
low	moderate	medium	increased	high

Strategic portfolio structure¹		%
█ Equities		30
█ Bonds		68
█ Liquidity		2

Balanced

Investment objectives				
The aim is to achieve a long-term asset growth by taking moderate risks that are accompanied with medium asset fluctuations.				
Risk profile				
Low risk		Higher risk

Investment Suitability

This publication is intended for general distribution. It is not part of any offer or recommendation and does not take into account your knowledge, experience and personal situation which is required for personal investment advice.

Legal information

This publication is deemed to be marketing material within the meaning of Article 68 of the Swiss Financial Services Act and is provided for informational purposes only. We will be happy to provide you with additional information about the specified financial products, such as the prospectus or the basic information sheet, free of charge, at any time.

Nothing contained in this publication should be construed as a solicitation or an offer or a recommendation to use any service or product, to buy or sell any investment or to carry out any other transaction. The information contained in this publication does not constitute investment advice or financial analysis. It is for information purposes only and therefore does not meet statutory requirements in terms of ensuring the impartiality of financial analysis. The information and views contained in this publication are intended for information and marketing purposes only and do not take into account any individual investment objectives, financial circumstances or requirements. The products and services described in this publication are supplied exclusively under the agreement entered into with the investor. Bank Vontobel AG makes no warranty as to the reliability or completeness of the information contained in this publication and disclaims all liability for any loss that may be suffered as a result of using such information. The nature, scope and prices of the products and services described in this publication may vary from one country to another and may change without notice at any time. Certain services and products are not available worldwide or from all companies within the Vontobel. In addition, they may be subject to legal restrictions in certain countries. Information on asset and currency allocations is approximate, intended for general guidance only and subject to change at any time. Such allocations may also vary from one client portfolio to another. Prior to making any investment decision or making any decision to use any products or services described in this publication, investors should determine whether such products and services are appropriate for their individual needs and independently verify (by consulting professional advisors where necessary) the specific risks involved (risk of loss, currency risks) and the potential regulatory, credit, tax and accounting implications. The tax treatment of products and services described in this publication will depend on individual circumstances and may change in the future. Bank Vontobel AG makes no warranty that any investment decisions and/or investments made in relation to products or services described in this publication will take due account of the investor's tax situation and accepts no liability in respect of the tax treatment of assets or any income generated therefrom. Moreover, Bank Vontobel AG makes no recommendation or endorsement with regard to any products or services described in this publication or their suitability for specific investors. Neither does it make any representation or warranty of any kind as to future performance. Investors should be aware that there are certain risks associated with all types of investment and that investments may be subject to sudden and large falls in their value. Investors are hereby advised to take note of the risks involved, which may be substantial. The products and services described herein are only intended for investors who understand and are willing to accept the associated risks. If the securities market becomes illiquid, it may not be possible to realize the value of certain investment products immediately. If investments are liquidated, investors may get back less than the amount originally invested. Investments in foreign currencies are subject to exchange rate fluctuations. Investing in emerging markets involves special or higher levels of risk. For this reason, it may be difficult to quantify the value of an investment and the risks to which investors are exposed.
