BNP Paribas becomes the eighth issuer on deritrade, Vontobel's leading platform for structured products

Starting from August 2019, Vontobel's digital market place for structured products, deritrade, will expand its product offering to investors with the introduction of Autocallable Barrier Reverse Convertible payoff structures from BNP Paribas as the eighth issuer on the platform.

"We are very happy to join as an issuer on one of Switzerland's leading structured products platforms for Private Banking clients. It enables us to gain immediate access to over 70 Swiss banks and 550 External Asset Managers with an addressable AuM potential of over CHF 2'000 billion – in a purely digital fashion, since deritrade offers a fully automated service for the end client", says Renaud Meary, Global Head of Private Banking and Distribution at BNP Paribas Global Markets. "It is fully aligned with our global strategy aimed at capturing the flows and at partnering with the most prominent platforms aggregating such flows".

"On behalf of our clients, I am especially pleased to have BNP Paribas as a new issuer on deritrade. Their expertise in the world of structured products, specifically in Autocallable Barrier Reverse Convertible Certificates, reinforces deritrade's positioning as a leading digital structured products platform for institutional clients. BNP Paribas, as an established leader in structured products, offers us a truly global reach and prominence in this area and opens possibilities for future expansion and synergies of the platform", says Roger Studer, Head of Vontobel Investment Banking.

With strong roots anchored in Europe's banking history, BNP Paribas supports its clients and employees in today's changing world and has positioned itself as a leading bank in the Eurozone and a prominent international banking institution. Within Global Markets, BNP Paribas' teams provide customized and innovative investment in equity markets across the globe.

deritrade is one of the leading multi-issuer platforms for tailor-made products in Switzerland. Over the years, deritrade has evolved into an intuitive self-service platform for relationship managers and external asset managers in Switzerland who want to offer their distinct private clientele a sensible choice of tailor-made structured products at transparent and competitive prices with a MiFID II compliant front-to-end-service over the whole product lifecycle. In 2018, over 36'000 individually tailored products with an issuance volume of CHF 6.0 billion (CHF 4.6 billion in 2017) were issued on deritrade.
