Implementation of MiFID ESG preferences in wealth management

Purpose

This document provides information about the current implementation of Markets in Financial Instruments Directive (MiFID) ESG preferences for the managed solutions offered by Vontobel. As part of the regulatory requirements of the Sustainable Financial Disclosure Regulation ("SFDR," Regulation (EU) 2019/2088) and the EU Taxonomy ("EUT," Regulation (EU) 2020/852), Vontobel has defined the relevant criteria and is currently guided by the proportions in the following overview in the mandates for each ESG preference.

ESG criteria

Different sustainability strategies can be chosen depending on the mandate. The ESG criteria used for the respective sustainability strategy are described in the relevant product information. The criteria with which the mandates are aligned according to Principal Adverse Impact ("PAI"), SFDR and EUT are described in the "Sustainable investing under the new EU regulatory framework" brochure. This can be found on our website: **vontobel.com/miftd**.

Important information about sustainable investment strategies

The higher the minimum share you choose, the less choice you currently have in terms of available products, which will limit the diversification of your portfolio, at least temporarily. As a result, you may not be able to take advantage of the same opportunities or market trends as investors who do not follow sustainable preferences. Companies may not meet high performance standards in all aspects of sustainable investing. There is also no guarantee that a company will meet expectations regarding corporate responsibility, sustainability and/or impact. In addition, selecting a high minimum share may mean that we cannot offer you an asset management mandate or that we cannot provide you with investment consulting. If this situation should arise as a result of your selection, your relationship manager will inform you. We would also like to point out that you can adjust your sustainability preferences at any time once you have set them. Information on ESG investments and integration, as well as sustainability-related disclosures, can be found in our ESG library at vontobel.com/sfdr.
