

Statement on principal adverse impacts (PAI) of investment advice on sustainability factors

Name	Legal Entity Identifier
Bank Vontobel AG	549300L7V4MGECYRM576
Vontobel Wealth Management SIM S.p.A.	815600EEA65C5119FF38
Bank Vontobel Europe AG	529900KKJ9XOK6WO4426

Purpose

The purpose of this document is to provide information on the regulatory deliverables as required by Regulation (EU) 2019/2088 ("SFDR") and specified by Commission Delegated Regulation (EU) 2022/1288 ("SFDR Regulatory Technical Standards" or "SFDR RTS") Article 11, on how the above listed Vontobel legal entities ("Vontobel") consider principal adverse impacts on sustainability factors (PAI) when providing investment advice to investors and clients. This statement is limited to Vontobel legal entities that provide investment advice according to SFDR.

Consideration of principal adverse impacts on sustainability factors

When providing investment advice to clients who are subject to European Union sustainable finance regulations and have expressed a preference to consider PAI, Vontobel considers the below indicated PAI in that advice.

How Vontobel uses the information published by financial market participants

SFDR requires financial markets participants to publish information on their websites on how they consider PAI of investment decisions. Vontobel uses this information by considering the following indicators of Table 1 of Annex I of the SFDR RTS:

INDICATORS IN SCOPE FROM ANNEX I OF THE SFDR RTS

10: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

Whether Vontobel ranks and selects financial products based on these indicators

Vontobel uses these indicators in the investment advice to select financial products. However, Vontobel does not rank financial products using these indicators or any additional indicators of Table 1 of Annex I of the SFDR RTS.

For clients that have interest for financial instruments considering PAI according to their MiFID II sustainability preferences, further principal adverse impacts may be considered in advising those clients in line with their sustainability preferences.

Whether Vontobel applies any criteria or thresholds on these indicators that are used to select, or advise on, financial products

Companies with any tie to controversial weapons, or with a very severe controversy are highlighted to the client. Controversial weapons are cluster munitions, landmines, biological weapons, chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and non-detectable fragments. A very severe controversy is, for example, a violation of the UN Guiding Principles on Business and Human Rights, the OECD Guidelines for Multinational Enterprises, the International Labor Organization (ILO) Declaration on Fundamental Principles and Rights at Work, or the UN Global Compact. For this purpose, Vontobel uses data and assessments provided by selected ESG data providers (e.g., MSCI ESG). Vontobel does not apply any thresholds for these indicators.
